DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Jolly on 21 September 2004.

2. Cancel claim **22**.

Allowable Subject Matter

3. Claims **1 – 21** are allowed.
4. The following is an examiner's statement of reasons for allowance:
 - a. The primary reason for the allowance of claims **1 - 5** is the inclusion of the limitation of a computer readable medium integrated into a removable cartridge for an image forming device, the medium being programmed with a plurality of image enhancement data sets and data set selection criteria for selecting from among the image enhancement data sets. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
 - b. The primary reason for the allowance of claims **6 - 9** is the inclusion of the limitation of a removable cartridge for an image forming device having a memory programmed with a

plurality of image enhancement data sets and data set selection criteria for selecting from among the image enhancement data sets.

c. The primary reason for the allowance of claim 10 is the inclusion of the limitation of a removable cartridge for an image forming device comprising a memory formatted to store a state variable reflecting a state of the printing component and programmed with a plurality of image enhancement data sets and data set selection criteria that can be processed with the state variable to select from among the image enhancement data sets.

d. The primary reason for the allowance of claims 11 - 16 is the inclusion of the method step of an image enhancement method, comprising selecting an image enhancement data set from a plurality of image enhancement data sets contained in a memory integrates into a removable cartridge for an image forming device; and implementing an image enhancement technique according to the selected image enhancement data set.

e. The primary reason for the allowance of claims 17 - 21 is the inclusion of the limitation of a computer readable medium having instructions for selecting an image enhancement data set from a plurality of image enhancement data sets contained in a memory integrated into a removable cartridge for an image forming device; and implementing an image enhancement technique identified by the selected image enhancement data set.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

a. Inoue et al. (U.S. 6,275,535 B1) disclose a computer readable medium, Figure 1, element 5 (image memory), Column 4, lines 6 – 18, the medium being programmed with a plurality of image enhancement data sets, Figure 2, elements 13-1 (resolution information), 13-2 (color processing information), and 13-11 (vibration sensor value information) and data set selection criteria for selecting from among the image enhancement techniques, Figure 2, elements 13-15 (color processing parameter information in camera) and element 13-17 (camera recommended printing parameter). Inoue et al. fail to teach the claimed invention of removable cartridge for use with an image forming device.
